

Attempts by Washington and Brussels to push Russia to the fringes of global politics because of the Ukrainian crisis seem to have failed. Thanks to its important role in mediating the Iranian nuclear agreement, and to its unexpected military intervention in Syria, Moscow proved once again to be a key player in international politics. However, Russia's recovered assertiveness may represent a challenge to the uncertain leadership of the West. This report aims to gauge Russia's current role in the light of recent developments on the international stage. The overall Russian foreign policy strategy is examined by taking into account its most important issues: Ukraine and the relationship with the West; the Middle East (intervention in Syria, and ongoing relations with Turkey, Iran and Saudi Arabia); the development of the Eurasian Economic Union; the Russian pivot towards Asia, and China in particular. The volume also analyzes if and to what extent Moscow can fulfill its ambitions in a context of falling oil prices and international sanctions.

*ISPI.* The Italian Institute for International Political Studies (ISPI) is an independent think tank dedicated to being a resource for government officials, business executives, journalists, civil servants, students and the public at large wishing to better understand international issues. It monitors geopolitical areas as well as major trends in international affairs. Founded in Milan in 1934, ISPI is the only Italian Institute – and one of the few in Europe – to place research activities side by side to training, organization of international conferences, and the analysis of the international environment for businesses. Comprehensive interdisciplinary analysis is achieved through close collaboration with experts (academics and non-academics alike) in political, economic, legal, historical and strategic studies and through an evergrowing network of think tanks, research centers, and Universities in Europe and beyond.
