

## Ingegneria dell'Ambiente, n°3/2016

### INDICE

#### EDITORIAL

The sludge, inevitable product of wastewater treatment (Roberto Canziani)

#### ARTICLES

Olive nut as biotrench carbon source for biological groundwater denitrification (Marco Capodici, Claudia Morici, Alessia Avona, Gaspare Viviani)

Application of advance statistical techniques (Design of Experiments) To watertreatment process (Riccardo Delli Compagni, Andrea Turolla, Laura Domínguez Henao, Manuela Antonelli)

The infulence of slurry-handling systems on biogas production in dairy farms (Davide Gardoni, Damiano Coppolecchia, Cecilia Baldini, Federica Borgonovo, Marcella Guarino)

Integrated geophysical techniques applied to characterize covers and detect biogasin a controlled landfill (Giorgio De Donno, Luca Di Giambattista, Luciana Orlando)

Remediation of hydrocarbon-contaminated aquifers by microwave irradiation (Pietro Paolo Falciglia, Giuseppe Mancuso, Riccardo Maddalena, Valeria Messina, Paolo Roccaro, Federic Vagliasindi)

Comparison of air quality measurements with microscale simulation ofatmospheric dispersion of vehicular emissions based on automatic traffic flowdata (Grazia Ghermandi, Sara Fabbi, Alessandro Bigi, Sergio Teggi, Luca Torreggiani) RIFERIMENTI BIBLIOGRAFICI

Prezzo cartaceo: 15,00 €
