

## INDICE

### EDITORIAL

Life Cycle Assessment applied to waste management: the importance of a robust methodology – Lucia Rigamonti, Andrea Fedele

### ARTICLES

- Life Cycle Assessment of different processes and technologies for leachate treatment: a case study – Francesco Di Maria, Federico Sisani
- The integrated use of LCA and GIS in order to facilitate reuse and enhancement of pre-consumer scrap/waste coming from industrial sector – Marco Migliore, Andrea Campioli, Monica Lavagna, Ilaria Oberti, Giancarlo Paganin, Cinzia Talamo
- Improving the environmental profile of a waste treatment system via Life Cycle Assessment – Pietro A. Renzulli, Bruno Notarnicola, Giuseppe Tassielli, Gabriella Fedele
- Combining Life Cycle Assessment and environmental life cycle costing: the case of aluminium cans in a circular economy – Davide Visini, Raffaele Princigallo, Alessandra Bonoli, Monia Niero
- Circular economy, waste management and life cycle thinking – Serena Giorgi, Monica Lavagna, Andrea Campioli
- Material flow analysis and carbon footprint. Approach combined to circular economy of the mineral bottled water sector – Francesca Lonoce, Vera Amicarelli, Giovanni Lagioia, Lorena Carla Giannossa

### COMMUNICATIONS

Determination of carbon footprint from winery by-products and their biological value – Noemi Bevilacqua Massimo Morassut, Maria Cecilia Serra, Francesca Cecchini
